## Tips & Fixes

### Ringer Time-out

By default, a DSI-375 in the ringing state will time out in 5 minutes and stop ringing. This period can be changed to 1 through 9 minutes, or set to 0 to disable time-out (rings until answered).

- Apply power so LED is blinking rapidly (maximum 20 seconds between keypresses)
- Press \* and then 99 on on-hook MBS (Meridian Business Set)
- Press the number (1-9 or 0) that corresponds to the number of minutes you want the DSI-375 to ring or close its contacts (if unanswered)
- Press # 1 to enter this configuration

For example: \*992#1 will set the ringing time-out to 2 minutes.

### Recorder stops working

**Problem:** The recorder is not recording and the LED on the DSI-375 is flashing slowly. Someone has inadvertently pressed # 0 and turned the DSI off.

**Solution:** Press # 1 on the on-hook MBS to re-activate the DSI-375.

### Errata

Some copies of the User Guide contain one or more of the following errors:

- Page 26 under the section “Disabling Auxiliary Equipment for Day Service” should read “If you wish to reserve auxiliary equipment for Night Service only, **do not** activate this feature.”
- Page 30 under the section “Linking Configurations”, the last line should read \*53\*62\*#1
- Page 34 under the section “Operating the DSI Day to Day”: the last entry in the list should read “Night Service off # 8 3 **ascending** tones”
- “Switching back to Day Service” on Page 35 should read “The DSI sounds 3 **ascending** tones”

The User Guide pdf available on dees.com includes these corrections.
